VORTRAN LASER TECHNOLOGY STRADUS® 660-100

The Stradus® diode laser module is a fully integrated, plug and play, and self-contained laser module. The patented sealed optical cavity and the innovative electronics give the Stradus® laser unparalleled power stability, beam pointing stability, and low noise over time and temperature. Vortran's Graphical User Interface (GUI) software allows the user to control and monitor the module remotely via USB or RS-232.

1 10 1111
Analog Rise Time < 0.7 us
γα.οδ (1.00 γ)
Input Power (Head) 12V DC, 1.5A (max)
Input Power (Control Box) 90-250 VAC,
50/60Hz
Storage Temperature -10°C to +60°C
Operating Temperature +10°C to +45°C
Laser Head Weight 210g
Communication Mini-USB and
RS-232
CDRH Class IIIb
ESD Protection Class 4
EU Compliance CE Mark Certified
with control box
RoHS Compliance EU and China

- Medical, Biomedical & Industrial
- Patented Sealed Optical Cavity
- Self-contained & Compact
- Excellent Beam Quality
- Low Noise
- USB or RS-232 Interface with GUI
- Analog & Digital Modulation
- OEM Head or End-user Systems

Graphical User Interface Software

Note: Specifications guaranteed only at full power
